Cleaning & Sealing Home Exterior Surfaces

- Outdoor Fireplaces
- Concrete Walkways
- Concrete Pavers
- Concrete Walls
- Concrete Driveways
- Concrete Pool Decks
- Outdoor Counters
- Concrete Patios

Why Should Seal My Driveway, Patio, Walkway...?

Your HOME EXTERIOR is constantly subjected to sun, wind, rain, mold, mildew, algae and other environmental forces which over time, reduce the lifespan and curb-appeal of your home. When sealant is applied the sealant, not the surface, takes the brunt of Mother Nature.

Benefits of having your driveway, walkways, patio sealed

- Forms a waterproofing membrane
- Rejuvenates aged surfaces
- Pressure washing and sealing renews the overall appearance of your home and extend its life
- Slows down buildup of mold, mildew, algae and other environmental pollutants
- Resists ultraviolet rays

Driveway sealers come in many gloss levels, including no-gloss, matte, satin, semi-gloss, gloss and high-gloss. There are also slip resistant coatings which you may want to consider.
